

WTZE AM license is held in califorinia. the community of tazewell needs a local radio statio for emergency messages as flash flood info and this station has not been broadcasting anything now for a year the station is dark and no one cares. this is a prime example of what distant owners and totally irresponsable management brings to a real life community. nothing. is this one of the 6 license holders in virginia that failed to renew the license this month? If so a local group would like to cross file for the 1470 wtze am and fm in tazewell virginia. this is a urgent matter of public intrest and safty.
